

Jen's Speakers Intro

What does investment mean to you? Do you immediately think of dollar signs and stock portfolios? I know I do.

Once you understand the true meaning of investment, you begin to look at everything you do differently. Simply put, to invest is to put forth resources toward a desired outcome; resources like money, time, and energy.

Jen Moff is here to show you how everything we do comes back to being seen.

Less sugar and more spice, she is the founder of Magical Mindfulness; where she empowers burned-out, professional women to invest in themselves so they can step out of the shadows and into the spotlight.

Please help me welcome Jen Moff!
